Mark Justine J. Mauricio

Antipolo City, Rizal 1870 | +63-969-082-9260 | markjustinemau@gmail.com

Professional Summary

Recent Information Technology graduate with hands-on experience in full-stack web development, database management, and technical support. Proven ability to develop and deploy functional web applications for government operations, including time tracking, vehicle booking, and conference room reservation systems. Eager to contribute technical skills and grow within a dynamic IT team. Currently learning AI workflow automations using Make.com and n8n

Education

Bachelor of Science in Information Technology | STI College | 2022–2026
STI Academic Center Ortigas-Cainta, Ortigas Avenue Extension, Cainta, Philippines

Secondary Education | Sumulong Memorial High School (Senior High) | 2019–2022
M.L. Quezon Ext., Brgy. Dalig, Antipolo City

Experience

Intern Web App Developer with Automations & Technical Assistant | DepEd ICT Unit, Antipolo | *2026*

- Provided on-site technical troubleshooting for internet connectivity, audio/visual equipment, and display systems across DepEd office buildings
- Developed and deployed functional web applications for daily administrative use using Google App Script, including:
    - **Employee Time-In/Time-Out System**
    - **Vehicle Drop-off/Pick-up Booking System** with ticket generation and automated email notifications
    - **Conference Room Booking System** with automated email notifications
    - **Personnel Contract Audit & Renewal System** *(Unfinished)* with email notification workflows
- Collaborated with end-users to gather requirements and ensure applications met operational needs
- Used AI-assisted development tools to generate code, troubleshoot issues, refine application logic, and accelerate development, followed by manual testing and validation.

E-Commerce Website Developer (Capstone Project) | STI College | *2025-2026*

- Designed and implemented both front-end and back-end components for a full-stack e-commerce platform
- Managed and maintained SQL databases for product inventory, user data, and transaction records
- Collaborated with team members on development tasks, code changes, and application improvements.
- Used AI-assisted coding tools to support implementation, debugging, and refinement of front-end and back-end functionality.
